New adjustments were made by the Municipal Defense Council to phase three of the post-covid-19 stage, in which the territory is located, in order to avoid a re-outbreak of the coronavirus, taking into account the increase in the disease in various provinces of the country.

Among the modifications are the mandatory use of the nasobuco after leaving homes, the closure of recreational activities in both state and residential entities at midnight; at the same time, the circulation of citizens and vehicles is prohibited from one in the morning.

In the same way, the hand and foot disinfection points are retaken in all administrative units, while the end of the gastronomic offers on the beaches will be at six in the afternoon and the last return trip at seven at night.

On the other hand, flights are limited only to health needs, and the transfer of passengers to and from the territory by way of the patana is prohibited.

Both the Defense Council and the health authorities call on the pineros to extreme the frequent washing of their hands and comply with social distancing in order to contribute with all the actions that are undertaken on the Island to keep it without positive cases to the Covid-19.
