Collection of Urban Solid Waste (DSU).

Throughout the territory. This service is free for the population and state entities. Communal Services workers are not responsible for collecting the large volumes of DSU generated by other sectors and entities in the fulfillment of their state functions.

Hazardous Biological Waste Collection Services (DBP).

Health care centers. This service is free. You should know that hazardous biological waste or waste from health institutions is collected by complying with special measures to avoid cross-contamination (transmission from individual to individual). For this, these wastes must be properly packed in nylon bags without any manipulation. Once these DBP are collected in health institutions, they are transferred to municipal landfills, where they are buried in DBP wells, which exist in each landfill.
