The Commerce network began the sale of chlorine at five percent as part of the preventive measures that take place in the Isle of Youth to face, with hygiene and responsibility, the covid-19 virus.

In local wineries and supermarkets, the conditions have been created for consumers to purchase the product, at a rate of half a liter per core and at a value of 15 pesos, always presenting the supply book.

Antonio Bejerano Escobar, commercial for the Company of Commerce, Gastronomy and Services in the territory, explained the details for the conversion to one percent.

For a liter with water pour ten drops of chlorine; for ten pour 100 or five milliliters (ml) and to prepare 100, pour one thousand or 50 ml.

It is appropriate to point out that consumers must carry the container with a lid, so as to maintain the properties of the solution, which is used to disinfect hands and surfaces in homes.
