The union movement of Isla de la Juventud today starred in a productive day to buy time in the furrow to tropical storm Elsa.

Thanks to the favorable epidemiological scenario that the municipality shows when living 18 consecutive days without cases of COVID-19, more than a hundred workers took advantage of the calm to plant sweet potatoes, prepare beds for the cultivation of vegetables and plant more than three thousand seedlings of roses, Yusmari Olivera, general secretary of the Municipal Committee of the Cuban Workers' Central, told the Cuban News Agency that the voluntary contribution of affiliates to food production is part of the work system, the main objective of the Integrated Development Program aligned with the economic-social strategy of the country.

In this sense, the workers of the Municipal Sports and Education Directorates stand out in this quarter in the socialist emulation, who have also been actively linked in the isolation centers to the epidemiological surveillance of people reported as contacts, she said. The culmination of the productive day was the official activation of the Municipal Defense Council, headed by its president Zunilda García, who insisted that the measures established for the current phase be complied with in accordance with the provisions of the governing documents of the Civil Defense system.

## Time is used in production before the arrival of tropical storm Elsa

The also member of the Central Committee of the Communist Party of Cuba and first secretary in the Pinero territory emphasized the importance of self-evacuation of people who live in vulnerable conditions towards the houses of friends and / or relatives in good technical constructive condition.

The appointment served to verify that the municipality is prepared to face the onslaught of tropical storm Elsa by having a guarantee of water, electricity, communication, health, liquefied gas and trade services, among others, as well as the basic food basket from of the sale of this to the population since last Friday.

Likewise, time is gained in community service tasks in cleaning gutters and sewers, to avoid flooding in the lower areas of the city due to the occurrence of heavy and intense rains associated with the meteor.

Liván Fuentes, president of the Municipal Assembly, called on the population to avoid mobility, especially when the tropical organism is closer to the territory to avoid human losses and insisted on monitoring the dams, today at 73.3 percent of its total filling capacity.
